

Brain Perfusion (Stroke Protocol)

CTP brain will be performed on Code Neuro exams with VizAI LVO positive CTA results.

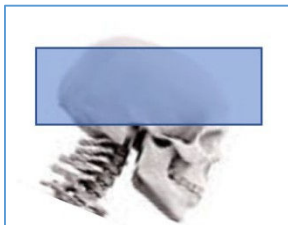

CTP will not be repeated as part of a Code Neuro exam for patient motion or other technical limitations during exam. CTP exam must go in a separate exam folder in PACS from the CT head and CTA head and neck.

If VizAI LVO CTA results are negative, CTP will not be performed and CTP order is canceled.

Scan Ranges and Acquisitions: Perfusion CTP

Attempt to avoid scanning over lens of the eyes in CTP acquisition.

If unable to avoid lens of the eye in CTP scan range, tech must include justification note (Patient in C-collar, Patient habitus, etc.) on study notes in EMR.
